**Fabian Bellgardt & David Dogon**

# Speakers

**Fabian Bellgardt**

Strategic Assistant

*Background in Electrical & Industrial  
Engineering.*

**David Dogon**

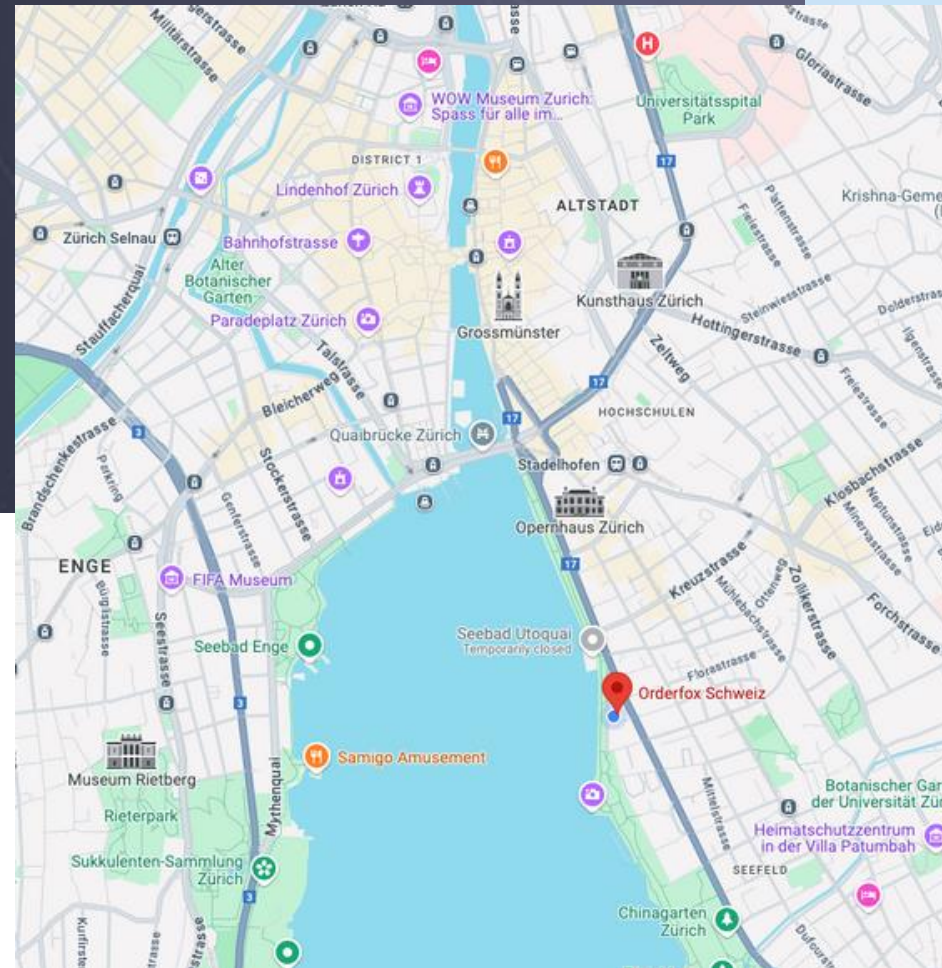

AI Product Director

*PHD in Chemical/ Mechanical  
Engineering.*

# About Us

- Zurich-based Startup
- Ca. 30 employees - growing fast

## What is our company culture?

1

Committed to reshaping industry with AI.

2

Everyone contributes ideas, regardless of role or background.

3

International team, from different backgrounds and experiences.

Villa Windegg

# Mission & Products

Orderfox strives to become a leader in AI-driven solutions for B2B and industrial sectors, setting the standard for innovation and excellence.

**Partfox - The world's largest AI-based CNC network**

Partfox is the largest CNC network in the industry, connecting CNC buyers and CNC manufacturers worldwide with precision and efficiency through AI-powered matchmaking.

**Gieni AI 2.0 - The world's first and only B2B Chatbot that acts as a true AI agent**

Gieni AI 2.0 sets new standards and generates unique data as well as deep market insights. With semantic search and zero-shot classification, Gieni AI 2.0 provides maximum precision and valuable information.

# Gieni helps you to increase your market share

Gieni AI 2.0 is a unique B2B chatbot that acts as a true AI agent, delivering precise market insights for any industry in the future. Originally developed for the CNC manufacturing industry, Gieni AI 2.0 sets new standards and generates unique data as well as deep market insights. With semantic search and zero-shot classification, Gieni AI 2.0 provides maximum precision and valuable information.

Start Gieni

# Where We Stand

## Orderfox Becomes One of the First AI Agents Integrated into Microsoft Copilot!

We're thrilled to share that Orderfox has signed a global strategic partnership with Microsoft in Redmond. This official agreement marks a major milestone, opening up new opportunities for growth and collaboration on a global scale.

"We're not just integrating software – we're creating a transformative way of thinking: intuitive, immediate, and context-based."

Derek Tanner, CEO at Orderfox.

# Challenge Overview

## What Is RAG and Why It Matters?

- Retrieval-Augmented Generation (RAG) combines the reasoning power of large language models (LLMs) with external data.
- In the era of agentic AI, this hybrid approach is transforming how intelligent systems handle complex queries.
- RAG enables agents to access domain-specific knowledge, making them more accurate and insightful.

## End User: The Supply Chain Director

The user persona is a Supply Chain Director responsible for vendor sourcing, risk assessment, and procurement decisions. They rely on Gieni to:

- Identify capacity or risks
- Find alternative suppliers
- Explore new market opportunities

The agent should handle queries like:

- “Which companies in Southern Italy produce aluminum auto components?”
- “In which markets can I find new buyers for speciality chemicals?”

## What Gieni AI Does

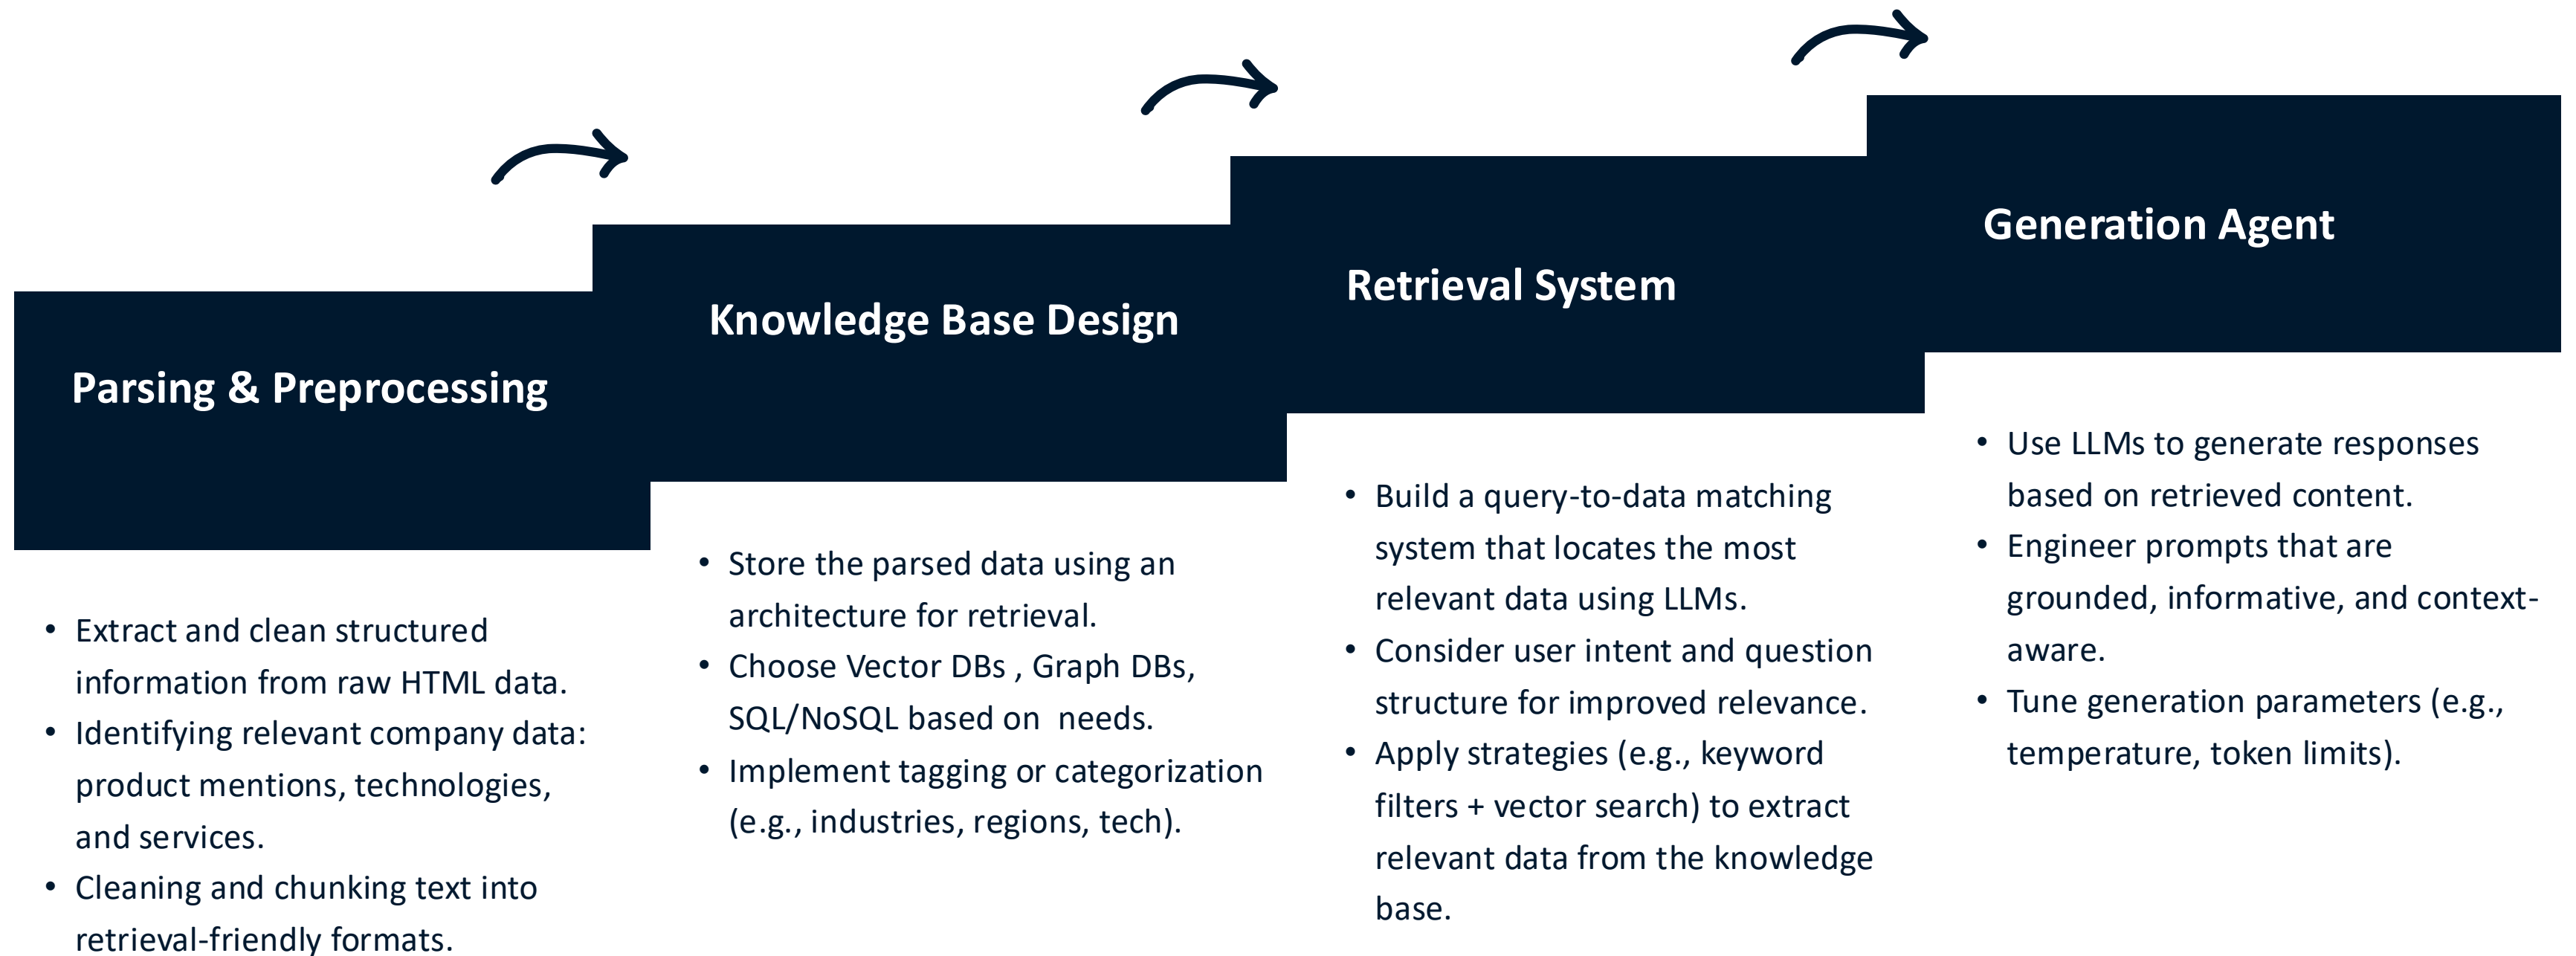

- Gieni is a B2B research agent that leverages RAG to generate deep market and company intelligence.
- Gieni mines real-world data—including complex HTML scraped from company websites—to offer actionable insights across supply chains, technology trends, and competitive landscapes.
- Gieni mimics an analyst by researching companies, industries, and regions at scale.

## What You'll Be Working With

- We provide all the components to build your intelligent RAG agent:
- Real-world dataset of raw HTML scraped from production pipelines
- OpenAI API key with a \$40 usage budget
- Jupyter Notebook pre-loaded with a skeleton workflow
- Your mission is to build a robust, creative, and insightful agent system on top of this foundation.
